

Solarmonkey & Solar Nut Portable iPod/Mobile Charger Info

Is your mobile phone always running out of juice in the middle of an important call? Fed up with your iPod battery running out whilst you're sunning yourself on the beach?

Don't fret! Solarmonkey is here and ready to provide you with power - directly from the sun!

A solar charger and unit to hold the charge, the Solarmonkey & Solarnut can be connected directly to your phone, iPod, PDA, PSP and more, enabling you to recharge without the need for batteries or a mains power supply!

Specially designed to work with the Solarmonkey, the new Solarnut reserves redundant solar energy so that if a sunny day turns cloudy whilst you're using your Solarmonkey, charging of your device is not affected.

Solarnut can also be used as a stand alone emergency charger, providing you with up to a quarter of mobile phone power or at least 15 minutes of talk time. To make the most of your Solarnut, recharge it (via solarmonkey) at least once every 2-3 months!

Did you know that the solarmonkey will also work under incandescent lights such as a table lamp - genius!

The Solarmonkey comes with tips for the most popular makes of mobile phones and devices:

Nokia & Mini Nokia

Motorola V66

Samsung E900

LG Chocolate

Sony Ericsson Wide connector

Mini USB

Female USB charging tip

iPod connector

DC4.0 for Sony PSP
